

St. Paul Apartment & Village

It has been a tough year. I hope all are well. We are still on lock down by the Governor and we still require a mask and allow only the caregiver to go in to see a Resident. The staff has done an excellent job with cleaning and keeping things as safe as possible. We have had 2 deaths of people in the hospital and 5 people with covid all under quarantine, that is something we can all be proud of. Although 2 deaths are more than we want we can be proud of the job the staff is doing in keeping all safe.

We have to repair the electrical system that controls all of the electricity in the Apartments. We have hired a contractor and awarded the bid to a company, All State Electric. With the outbreak of covid, things are moving slowly with the parts coming in but we should start putting in the new system by the end of January.

The Village had an electrical emergency that disrupted the power for all the Village. We were able to get Macon Power in the middle of the night and were able to get heat and lights to the Residents of the Village. We got a replacement part from Atlanta and got everyone back on line the next day. I have heard from numerus Residents that said the Christmas meal was great and expressed how good it was that we took the time to give it to them.

Several said it was great and it was great to have a meal that they did not have to cook. In the coming year we are looking forward to getting the electrical work done and for the safety and well-being of all.
